By some persons of considerable political prominence and by some leading presses, a systematic effort appears to be put forth to reconcile the public mind to the idethat the future policy of the Government may be formed on the basis of a compromise with the cause of the ex-Isting rebellion, which will admit of the re-establishment of Slavery in the States where it has been abelished by your proclamation of January last.

To pave the way, apparently, for such a compromise Northern sympathizers with rebellion and some too who cannot justly be so designated, constantly endeavor to impress on the public mind the notion that our National and State Constitutions were made for the white race

No one denies, I believe, that the people of the whitrace were much more considered in framing our Constitations than the people of the black race; but the impresion sought to be made is that the blacks are excluded by their terms, and by inference, from being regarde as a part of the people for whom they were made.

The proposition so understood I propose briefly to consider; and then to add a few words on the policy to peace through a full and complete amnesty and the abro gation of your Proclamation of Emancipation.

I have sought in vain for a section or provision in that instrument which, in terms, sustains the proposition, or which can, by any possible construction, give color to it. I find, in fact, in the Constitution, the converse of the proposi first article of the Constitution is as follows: "Representatives and direct taxes shall be apportioned among
